

CALL FOR PAPERS

SPECIAL ISSUE: **MINERAL DEPOSITS OF LATIN AMERICA AND THE CARIBBEAN**

We are intending to publish a **special issue on Mineral Deposits of Latin America and the Caribbean** in the **Boletín de la Sociedad Geológica Mexicana** (BSGM, <http://boletinsgm.igeolcu.unam.mx/bsgm/>). The BSGM is a completely free access semi-annual journal, the oldest strictly peer-reviewed journal on Earth Sciences in Mexico and one of the oldest in Latin America, and is included in the Web of Science, Journal Citation Reports, SciELO, Scopus, and in many other instruments.

We do not aim to restrict our scope to any type of deposits or type of studies, and all contributions related to the formation of mineral deposits in Latin America, the Caribbean or conterminous regions are most welcome, from the regional to the mineral-association scales of observation and analysis. Both original research papers and original thematic reviews are welcome as either full-length papers or short notes. Both Industry and Academia authors are encouraged to submit their contributions.

Contributions focused on mineral deposits from Mexico, Cuba, Peru, Bolivia, Colombia, Venezuela and the Dominican Republic are so far lined up!

The **guest editors** to this special issue are

- Joaquín A. Proenza (Universitat de Barcelona),
- Lisard Torró (Pontificia Universidad Católica del Perú), and
- Carl E. Nelson (Recursos del Caribe S.A.)

All inquiries associated with this special issue or the journal itself must be addressed to the Editor-in-Chief of the BSGM (Antoni Camprubí, camprubitaga@gmail.com).

Contributions can be written in either English or Spanish, and must adhere to our instructions to authors (<http://boletinsgm.igeolcu.unam.mx/bsgm/index.php/instrucciones-instructions>). We apply **no restrictions** with regard to number of pages, number of figures or tables (other than those determined by our valued scientific reviewers and provided that they are meaningful additions), and **we do not charge** for coloured figures or for any other matter.

First, we need to have a precise idea of how many contributions can be effectively expected for this call for papers; therefore, we need the interested contributors to kindly provide a tentative title, a list of authors (with their institution names and contact emails), and a 300-word synopsis of their intended contributions.

Important dates:

- November 3, 2018: deadline for submittal of tentative title, author list and synopsis.
- May 31, 2019: deadline for submittal of original manuscripts
- August 31, 2019: deadline for all revisions by peers of submitted manuscripts.
- October 31, 2019: deadline for submittal of revised manuscripts.
- April 30, 2020: deadline for online publication of all accepted contributions.

The dates above are only tentative and may be corrected depending on the amount of contributions to this issue. Any changes in schedule will be notified to all contributors as soon as necessary.

CALL FOR PAPERS

SPECIAL ISSUE: **MINERAL DEPOSITS OF LATIN AMERICA AND THE CARIBBEAN**

IMPORTANT: EXTENSION OF DEADLINES

The original deadlines and important dates for this special issue have been extended four months. The reason for this modification is that the special issue has been moved from *no. 1* to *no. 2* (vol. 72, 2020).

The new dates are:

- **September 30, 2019:** deadline for submittal of original manuscripts
- **December 31, 2019:** deadline for all revisions by peers of submitted manuscripts.
- **February 28, 2020:** deadline for submittal of revised manuscripts.
- **August 31, 2020:** deadline for online publication of all accepted contributions.
