

CALL FOR PAPERS

Seismology in Latin America: past, current practices and future studies

SPECIAL ISSUE IN Boletín de la Sociedad Geológica Mexicana

This Special Issue will compile a collection of technical and scientific papers related to research and applications in the Seismology field in Latin America. Studies addressing the physics and geologic aspects of earthquake sources, path and site effects and seismic and geologic risks are welcome. We intend to publish original long research papers, called “artículos”, and short notes, called “notas técnicas”, book reviews, and general monographic reviews. The manuscript should be elaborated according editorial policy of the journal:

<http://boletinsgm.igeolcu.unam.mx/bsgm/index.php/instrucciones-instrucciones>

and sent to one of the Editors before June 30th, 2025 (or at earliest convenience). The special volume will be published by first semester of 2026. However, accepted papers will be available immediately online.

Guest Editors:
