

TERCER SIMPOSIO INTERNACIONAL DE GONDWANA

Del 6 al 11 de agosto de 1973, Canberra, Australia.

El Dr. J. M. Dickins, Presidente del Comité Organizador del Tercer Simposio Internacional de Gondwana, por conducto del Dr. Zoltan de Cserna, ha solicitado a nuestra Sociedad para que demos a conocer a nuestros socios este evento de trascendencia internacional en el campo de la geología, que tendrá lugar en 1973 en Australia. Por lo anterior, a continuación se transcribe el anuncio preliminar de dicho evento que nos fue enviado.

Following highly successful symposia in Argentina and South Africa the Gondwana Subcommission of IUGS has approved a proposal to hold the third meeting of Gondwana Specialists in Australia, from 6-11 August 1972, under the sponsorship of the International Union of Geological Sciences and the Australian Academy of Science.

Programme:

1. *Paleogeography (including palaeoclimate and palaeomagnetism).*
2. *Gondwana Floras.*
3. *Environment and origin of Gondwana coal deposits.*
4. *Age and stratigraphical relations of the glacial deposits.*
5. *Advances in stratigraphy and paleontology.*
6. *Tectonics — igneous activity; geochronology; structural geology and nature of the continental margins.*

In addition field excursions are being planned for the week preceding (a) and two weeks following (b & c) the symposium:

- a) 1. *Bowen Basin (Queensland) — Stratigraphy of the Upper Paleozoic and Triassic sections.*
2. *Igneous rocks of Queensland... and New England — Upper Paleozoic-mesozoic granites and volcanics.*
- b) 3. *Sydney Basin and New England — Hunter-Bowen Upper Paleozoic orogenic belt and adjacent Permian and Mesozoic, including Permo-Carboniferous glacials.*
4. *Ipswich — Great Artesian Basin — Mesozoic stratigraphy.*
- c) 5. *Perth and Carnarvon Basins West Australia — Upper Paleozoic-mesozoic stratigraphy, including glacial deposits.*
6. *South Australia, Victoria and Tasmania — Permian and Mesozoic geology including glacials and dolerite sills.*

A first circular giving details and requesting submission of papers will be circulated in 1972. The proceedings will be published and to expedite this completed manuscripts will be required prior to the symposium.

Interested persons are invited to apply to the Australian Academy of Science for the First Circular.
